WORK EXPERIENCE

Paradigm Networks

Software Engineer

July 2023 - Present

- Developed and integrated LLM-based features into enterprise applications.
- Led CI/CD automation and deployed solutions on AWS using EC2 and SageMaker.
- Directed large-scale dataset management and annotation for training pipelines.
- Contributed to fine-tuning and evaluating LLMs (both open-source and proprietary).

eBricks Inc

Associate Software Engineer

Jan 2023 - June 2023

- Built robust backend services using Django and FastAPI for business-critical applications.
- Designed APIs, managed PostgreSQL/MongoDB schemas, and enforced data security.
- Improved application performance by optimizing queries and implementing caching.

Clicky.pk

Full Stack Developer – Internship

May 2022 - Oct 2022

- Developed full-stack features using React, Django, and Node.js.
- Delivered responsive and user-centric interfaces with functional APIs.
- Participated in Agile sprints and learned version control best practices.

Information Technology University, Lahore

Mobile Application Lab Engineer (TA)

Jan 2024 - June 2024

- Mentored students on mobile application development and modern frameworks.
- Provided hands-on project support and guided lab exercises.

EDUCATION

Information Technology University, Lahore

Bachelor of Science in Computer Engineering - 3.23/4

2019 - 2023

CERTIFICATE

AWS Academy Graduate – Data Analytics

AWS Academy Cloud Foundations

Python Course: Basic to Advanced – Udemy

ChatGPT Prompt Engineering Mastery

LLM Fine Tuning Fundamentals + Fine tune OpenAI GPT model

Developer Program – Accenture Nordics

Front-End Web Development with React – Coursera

TECHNICAL SKILLS

- Languages:** Python, JavaScript, Golang, SQL
- Frameworks:** Django, FastAPI, React, Node.js
- Databases:** MongoDB, PostgreSQL, SQLite, MySQL
- Tools & Platforms:** AWS (EC2, S3, SageMaker), Git, Docker, GitHub Actions, Postman
- Core Competencies:** RESTful API Design, LLM Integration, Prompt Engineering, Data Labeling, Model Fine-Tuning
